- ◎ Mountains are high.
- ◎ The Rocky Mountains of Colorado are high.
- ◎ Climbing mountains is exciting.
- ◎ Why he climbed the mountain is a mystery to me.
- ◎ That he was a criminal surprised me.
- ◎ I know that he is from Canada.
- ◎ I do not know what time the party begins.
- ◎ He talked about what he had learned in his

One who adheres strongly to the principles of democracy would respect the right of others in the society.

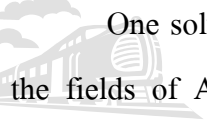

The rate of plant growth correlates positively with the amount of rainfall in an area; that is, the increase or decrease of rain is followed by an increase or decrease in plant growth.

Your parents and other kin, even your uncles and aunts, influence your life in some ways.

We all wish for a healthy body, a happy personality, a good mind, and a prosperous, or well-paying, form of work.

Many schools still segregate males from females; in the past, universities enrolled only men.

Though the representatives of countries may confer for many days, their discussions rarely lead to complete agreement.

One solution to the nation's termite problem could be growing in the fields of Africa. Seaphire International of Phoenix is developing termite-proof particleboard made from sea asparagus, a crop harvested annually in Africa and Mexico for its oil and asparagus tips. Because the plant is irrigated with seawater, the board has a salt content of 450 milligrams per ounce – salty enough to ruin the appetite of hungry termites.

Particleboard is used for cabinetry, flooring, and other nonstructural elements of a house. The new board is as strong as other medium-density agro-based particleboards, such as those made from rice, straw, and soy. In addition, says Seaphire's Roy Hodges, the board's high

salt content retards fires (its retardancy is comparable with that of particleboard specially treated to resist fire).

The new board should appear commercially in about a year, first in deforested Eritrea— a small African country on the Red Sea with the world’s largest sea asparagus farms—then in the United States around 2004. Seaphire plans to expand its farms in Mexico to manufacture boards for the United States. That may help alleviate the termite problem that plagues Southern California and other warm regions.

 The national problem mentioned in the text is caused by \_\_\_\_\_ .

1. poor farming in warm regions
2. particleboard
3. an overabundance of sea asparagus
4. termites

 It is stated in the text that farmers gather sea asparagus.

1. once a year
2. in any season
3. in the summer
4. twice a year

 From sea asparagus, we can get \_\_\_\_\_ .

1. termites
2. Seawater
3. straw
4. Oil
